

ADVANTAGE POND PUMPS

Evolution pond pumps provide high performance, low energy consumption and quiet operation!

- Evolution pond pumps are the leader in high efficiency and performance!
- External suction side pumps for water features, garden ponds, and Koi fish ponds!
- Evolution pond pumps serve a wide variety of water transfer and re-circulation applications!

ES PUMP

- Totally enclosed fan cooled motor
- Whisper quiet operation
- Low energy consumption
- 9 ft, 115V power cord
- 2" quick connect unions
- Strainer basket available/acceptable
- 1 Year Warranty

ESS PUMP

- Flow rates up to 9,600 GPH
- 9 ft, 115V power cord
- 2" quick connect unions
- Built-in strainer pot
- 1 Year Warranty

ESBB PUMP

- True 3" flow through connectors
- Energy efficient TEFC motor
- Whisper quiet operation
- Lowest energy consumption available for volume of water generated
- Silicon carbide seal
- 9 ft cord on 115V models
- 1 Year Warranty

VARIABLE SPEED PUMP

- Manual variable speed to set exact flow rates
- NEMA 4X enclosure
- 2" and 2.5" union connectors included
- 115 volt or 230 volt
- Extremely quiet operation
- 1 Year Warranty

POND BIO FILTERS

STRAINER BASKETS

- Works with low-amp pumps
- Easy to clean backwash option
- Backwashing pressure filter may be placed anywhere on the discharge of the pump
- Filter comes assembled with Bio-bead media
- Bio-bead media is designed for use with Koi and water garden ponds
- Pressure gauge to indicate when to backwash
- 1" screened drain for winterizing
- Filters from 1,000 to 20,000 gallons
- 1 Year Warranty

Bio Media

Bio Media is designed with ridges and a cross section increasing bio surface area and preventing clumping. The ridged design helps to create a dense bed for superior trapping of solids that is easily separated during the backwash cycle. Included in Filter. Also sold separately by the cubic foot.

ETBA-500

- Maximizes flow of energy efficient pumps
- Strong ABS housing, 500 cubic inch capacity
- High strength see-through lid and easy access basket
- Drain plug for winterization
- Adjustable feet to match with any pump height
- Available in 2x2, 3x2 & 3x3 configurations

ETBA2

- Maximizes flow of energy efficient pumps
- Strong ABS housing, 90 cubic inch capacity
- High strength see-through lid and easy access basket
- Drain plug for winterization

COMPLETE POND FILTER SYSTEMS

- Base mounted Pump and Filter System
- Pump and Filter ship separately
- Includes flexible PVC tubing
- Includes all PVC fittings and unions
- 9 ft, 115V power cord
- 1 Year limited Warranty

CHECK VALVE

For applications that require above water level pump placement. All units are made from 100% PVC with a rubber sealed flapper swing valve.

ANTI-FISH ENTRAPMENT DEVICE

Save your fish from getting stuck in an intake or near an intake which deprives them of oxygen. This little gizmo will still pull water at a high rate but it won't create the force that holds them under water or near intake pipes. Worth it's weight in gold this will save fish as well as other grateful critters.
